QUALIKAP QKP-N capsules are especially designed to be used as sterilizable final filter for small batches in pharma applications. QUALIKAP QKP-N are fitted with Nylon 6,6 membrane whose porosity guarantees high bacterial retention efficiency.

Typical applications are alcoholic solutions, ultra pure water, vaccines, physiological solutions, ophthalmic solutions, etc.

The manufacturing is done in a controlled environment; each filter element is tested to verify the integrity. Each capsule is supplied with conformity test certificate showing the lot.
